# Final Report

Please write a report.

"Solutions and Challenges of Security in Cyber-Physical Systems"

Any opinions, studies, and results related to the title are welcome.

## Instructions

- The style of the report can be found by the paper as below.
- At least six pages excluding references
- Please submit your report, together with your slide of the presentation to the email before June 30.

yuntao.wang@xjtu.edu.cn

This template, modified in MS Word 2007 and saved as a "Word 97-2003 Document" for the PC, provides authors with most of the formatting specifications needed for preparing electronic versions of their papers. All standard paper components have been specified for three reasons: (1) ease of use when formatting individual papers, (2) automatic compliance to electronic requirements that facilitate the concurrent or later production of electronic products, and (3) conformity of style throughout a conference proceedings. Margins, column widths, line spacing, and type styles are built-in; examples of the type styles are provided throughout this document and are identified in italic type, within parentheses, following the example. Some components, such in the title or heads unless they are unavoidable.

### $R \rightarrow IInits \omega$

- - Use either SI (MKS) or CGS as primary units. (SI units are encouraged.) English units may be used as secondary units (in parentheses). An exception would be the use of English units as identifiers in trade, such as "3.5-inch disk drive".
- - Avoid combining SI and CGS units, such as current in amperes and magnetic field in oersteds. This often leads to confusion because equations do not balance dimensionally. If vou must use mixed units, clearly state the units for each quantity that you use in an equation.
